

## Option & Price Guide

**Center Flap Piping - \$55.00:** Piping is available as accent trim between any or all lettered flaps.

**B-12 Snaps - \$30.00:** Snap connector leg strap hardware.

**Reserve Static Line - \$10.00:** Lanyard designed to activate reserve ripcord after cutaway from main.

**Stainless Steel Hardware - \$120.00 (\$190.00 w/hip rings):** Stainless hardware gives the rings a long lasting, rust resistant, chrome-like shine.

**Hip Rings - \$200:** Hip Rings add increased flexibility and comfort.

**Both BOC and ROL - \$35.00:** Useful deployment option for rental, demo equipment and those in transition.

**Zero Porosity Centerline Collapsible Pilot Chute - \$80.00:** Adds performance to any size canopy.

**Hacky Handle - \$25.00:** Leather ball pilot chute handle with up to two colors.

**Freefly Handle - \$25.00:** Low profile, pillow type pilot chute handle. Resistant to shifting or dislodging from container.

**4" Aluminum Hook Knife - \$25.00:** Rugged aluminum handle hook knife, mounted in a pocket on the leg strap.

**Custom Cutaway Handle - \$15.00:** Your Mirage will come standard with a red cutaway handle. Custom colors are listed below.

**Soft Reserve Ripcord Handle - \$40.00:** Pillow reserve handle resembling a cutaway handle. Custom colors are listed below.

**Deluxe Backpad - \$100.00:** Additional backpad padding adding comfort with an aesthetically pleasing stitch pattern.

**Tie-Dye - Full \$350.00, Partial (50% of rig or less) \$225.00:** Individually dyed to your custom color combination. Cordura only.

**Monogramming - Ring covers and handles \$20.00 each, Sidewalls \$30.00 each:** Monogramming is available with up to seven characters on the ring covers and cutaway handle. The side wall monogram of up to ten characters allows the option of advertising for your DZ or team. Custom embroidery designs are available and are priced individually. (No charge for Mirage logo)

**Spare Part Kits:** All parts need to be replaced periodically. Full set of replacement parts for your rig. Kit parts will **exactly** match your original parts (colors, sizes and options). Don't lose an afternoon's jumping due to lost or worn out components. Main kit is especially useful for a second canopy set up.

**Main Kit - 5% off price of parts:** Extra set of main risers with toggles, main pilot chute, main bag, aluminum hook knife, five elastic keepers, five main closing loops. Will match original parts (colors, sizes & options).

**Reserve Kit - 5% off price of parts:** Extra reserve pilot chute, reserve free bag and bridle, reserve ripcord, cutaway handle, two standard reserve loops, two Cypres reserve loops. Will match original parts (colors, sizes & options).

**Matching Book Bag - \$65:** Medium backpack will hold several books or similar sized items. Approximately 9"x13"

**Matching Mini Bag - \$50:** Small backpack with zipper against back for security. Approximately 7"x12"

## Color Guide

**Harness Colors:** Black, Charcoal, Navy Blue, Red, Royal Blue, Blackberry, Silver and White.

**Cordura, Binding Tape, and Custom Cutaway Handle Colors are available in the following colors:**

**Standard Colors:** Black, Charcoal, Navy Blue, Red, Royal Blue, Silver, Kelly Green, White, Yellow, and Light Blue.

**Neon Colors:** Dark Purple, Magenta, Neon Blue, Neon Green, Neon Orange, Neon Pink, Neon Yellow, Jade Green and Turquoise.

Please note that neon colored fabrics fade faster than fabrics in standard colors.

Colors may vary from lot to lot, therefore color shades cannot be guaranteed.

## Measuring Guide

In order to make a proper fitting container, it is necessary to take measurements that are correct and consistent. Since all measurements should be taken while standing erect, you might need to get a friend to help in the measuring process as some measurements are difficult to get without assistance. Measure around appropriate clothing with a soft measuring tape and be sure to keep the tape taught when reading measurements. Appropriate clothing should be of the type and thickness that you would normally wear skydiving.

**Height:** Without shoes.

**Weight:** Without clothes.

**Torso:** While holding the tape at the bottom of the hole in your throat measure diagonally over your chest to the very top of your hip bone at your side (approximately level with your belly button). A common mistake is to measure too low on the hip. We are looking for the shortest distance between these two points. This should be 15" to 20" (38 cm. to 51 cm.) with the average being 17 1/2 - 18" (45 cm).

**Leg Pad:** Measure around leg, as leg strap travels. Start and finish at the same point on the hip that you used for the torso measurement.

**Inseam:** Crotch to floor without shoes. (Not the same as your pants inseam)

**Chest/Cup:** Around chest at the nipples. For females, specify cup size.

**Waist:** Measure around waist at the navel.

**Long Girth:** Measure from the bottom of the hole in the throat, through the crotch and up your back to the base of the collar.
